Jajadds New Two Seater to the fleet

DOUBLE THUNDER

Marvin Foster, J&J Sales & Marketing Manager Here's the next phase in Stock Car look alike karts: Double Thunder. This is a two passenger version of J&J's popular new Thunderbolt and it utilizes the same chassis with slight variations. It has a 31" wide seat area that will accommodate two small adults, an adult and a child or a large adult. Head interference with the top is not a consideration since the kart features open "Targa" styling. Loading and unloading is also enhanced by the open top feature, promoting quicker pit stops and ultimately, more paying rides per day. Double Thunder is offered stock with Honda's GX270 9hp engine.

Other standard features include:

powder coated chassis that resists corrosion; spring steel bumper rails that do an excellent job of fending off other karts and track rails (and boast a 3 year warranty); color coded gas and brake pedals to help new drivers know what to do; self adjusting hydraulic disc brakes that require little attention; 4 point seat belt harness with color coded tabs to expedite quick in and out; 10 gauge heavy-duty split rim same size wheels mean tires are same size and easy to mount; customer choices from 400

color combinations gel-coated into the body make for a colorful fleet that doesn't show nicks and scratches like paint does; and, all J&J Karts are covered by a written warranty.

This kart is a real money maker because of its inviting styling and simplicity of operation and service. Good looks and Stock Car styling invites one or two paying customers. Double Thunder is priced to give you the option of a two person ride at the cost of a single kart. Call J&J to learn more.

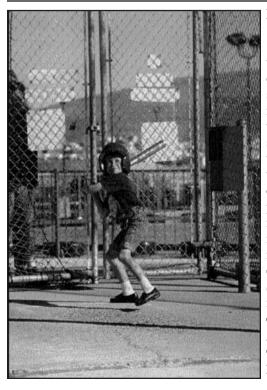

KIDZKARTS BRING SMILES! SEE PAGE 9

SAFETY PROGRAM FOR THE BATTING CAGE

ARE YOUR BATTING CAGES SAFE?

Dick Hall, ABC Vice President

THE FOLLOWING IS A SAMPLE "SAFETY PROGRAM" FOR A COMMERCIAL BATTING RANGE. PLEASE KEEP IN MIND THAT A SAFETY PROGRAM MAY INCLUDE OTHER ELEMENTS THAN THOSE DETAILED HERE. ALL BATTING RANGE OPERATIONS SHOULD HAVE A MANAGEMENT-SPONSORED COMPREHENSIVE "SAFETY PROGRAM".

MANAGEMENT

It is essential that the management of the Batting Cage support the development and implementation of an effective safety program. It is the responsibility of the management to commit to a safety program and to communicate this commitment to all of management's employees.The Safety Program must include employee safety as well as guest safety and methods to carry out the program.

EMPLOYEE SAFETY

The safety of the employee must be the first priority of any safety program. Employee safety is mandated by many agencies including federal, state and local municipalities. Be certain that the employee understand the risks that they are exposed to and how they can avoid these risks. Just as management must commit to the safety program, employees must also be willing to accept their responsibility to the program.

Employee Safety Exposure

- 1. Hit by pitched ball
- 2. Hit by batted Ball
- 3. Hit with bat outside of batting cage
- 4. Injury from contact with mechanical parts (i.e. wheels,belts, motors, electrical components)
- 5. Hit by balls in the "pit area".
- 6. Injuries while batting or giving instruction
- 7. Slip on floor
- 8. Fire or robbery
- 9. Horseplay

Employee Risk Reduction

- 1. Thoroughly train staff regarding all Safety/Warning policies (Warning Signs).
- 2. Wear Batting Helmets with Face Masks at all times while in hitting area-including "pit area"
- 3. Sound a warning to batters (whistle, yell) when going to "pit area"
- 4. Use safety netting in pit to block holes in netting while working in area
- Thoroughly train all staff on operation of all pitch ing machine and batting range equipment systems. Have all staff review maintenance procedures with ABC Operators Manual.
 - a. Train at initial hire
 - b. Re-train annually
- 6. Thoroughly train staff of all Operating Standards relating to safety and operations
- 7. Turn off and unplug all electrical components when servicing equipment
- 8. Give instructions from outside of cages-Do Not enter cage when player is batting
- 9. Stop machines from pitching immediately when accidents occur or when rule enforcement is neces sary
- Do not use batting cage after accident has occurred until all equipment has been checked for proper operation. Document all adjustments necessary to correct problem.
- 11. Train staff for all emergency policies.
 - a. Police telephone
 - b. Fire telephone
 - c. Ambulance Telephone
- 12. All staff must have a NO TOLERANCE RULE for breaking any Safety Rules or procedures

GUEST SAFETY

Guest safety is essential to the batting range success. All Guest safety programs must begin with the Employee safety program. Employees must be committed to this vital aspect of the business. The employees will be the most responsible for any Guest Safety Program implemented by Management.

Guest Safety Exposure

- 1. Hit by pitched balls
- 2. Hit by batted balls
- 3. Hit by bat outside of cages
- 4. Player too young or inexperienced to use a batting cage
- 5. Batters not standing in Batters Box
- 6. Non Contact injuries while batting (i.e. ankle, knee, other)
- 7. Players/Guest not complying with all posted Rules
- 8. Food poisoning
- 9. Fire

Continued on page 4

SAFETY PROGRAM FOR THE BATTING CAGE

Continued from page 2

- 10. Slip and fall
- Horseplay 11.

Guest Risk Reduction

- 1. List and display all SAFETY/WARNING SIGNS AND RULES for quest to follow (see "Operational Safety Standards")
- Have all Employees understand these SAFETY/WARNING SIGNS AND RULES and ENFORCE THESE RULES! (see "Operational Safety Standards")
- At least ONE Batting Range EMPLOYEE MUST BE ON DUTY AT ALL TIMES DURING CAGE **OPERATION!**
- Pitching machines, Warning Lights and related Feeding System must be adjusted and maintained at all times and must be in good working order at all times while batting cage is available for play.
- Signs must be posted stating type of cage (baseball or softball) and speeds of pitch in each cage.
- Regular cleaning of floor/concrete to prevent slip ping and to keep balls clean.
- All Netting and protective fencing must be repaired, maintained and replaced when necessary.
- Inspect, clean and replace worn balls regularly.
- Follow all local health and safety codes.
- Employee must stop balls from pitching 10. immediately when any accident occurs. Attend to quest immediately (refer to Management's Emergency Procedures). Do not allow batting in the batting cage where accident occurred until all equipment has been checked for proper operating condition.
- Completely Train and Re-train all employees about 10. safety risks of your guests and themselves!
- INSIST THAT EMPLOYEES HAVE ALL 11. **GUESTS FOLLOW THE POSTED RULES!** EMPLOYEES MUST HAVE A "ZERO TOLER ANCE RULE" FOR GUESTS BREAKING POST ED RULES!

EMPLOYEES MUST TAKE IMMEDIATE STEPS TO MINIMIZE SAFETY RISKS TO GUESTS WHEN RISK ARE APPARENT! (For example, stop pitching machines and remove batters from cage if danger is apparent).

FIRE PROTECTION

Fire protection should always be a part of Management's Safety program. Consult with local fire authorities about their requirements. Be certain that employees have knowledge about the fire protection available at the batting cage.

FIRST AID

Management should have four basic areas of responsibility for First Aid.

Employee First Aid-check with 1. local agencies about First Aid Kits and responsibility for Employee First Aid. your

- First Aid to Guests. 2.
 - Courtesy First Aid-band aids, ice. etc.
 - b. Emergency First Aid-have Emergency Plan documented for Employees for fol
- Record Keeping and Reporting-it is essential that 3. all first aid (either employee of quest related) be documented and maintained for future reference.
- Injury Claims Defense-providing first aid and doc 4. umenting the type and extent of all injuries and how the injury occurred is necessary for any Injury Claims Defense.

INSPECTIONS

A Safety Program should address the need for inspections. These inspections should be focused in at least four areas:

- 1. Inspection of employees work area. 2. Inspections to Insure Guest Safety
 - Inspections for Housekeeping and Fire Protection
 - Required inspections for Federal, State and Local Requirements.

ACCIDENT INVESTIGATION

In order to reduce accidents from occurring, a preventive program must be in place. Recognizing potential risks and taking the appropriate steps to minimize or eliminate these risks is critical. All accidents must be investigated and documented-even if injuries have not resulted from the accident. Communicating these accidents should a regular occurrence within the Safety Program.

SAFETY TRAINING

Safety training should not be confused with Job Training. Safety Training should be conducted singularly and considered a separate responsibility of the employee. Safety Training should be conducted when the employee is first hired and should be reviewed at least once a year.

RECORD KEEPING

Record Keeping for the Safety Program should include several records including; Employee Injury Reports, Guest Injury Reports, Inspection/Maintenance Reports, documented Safety Program training and reviews and "Accident Investigation" meetings.

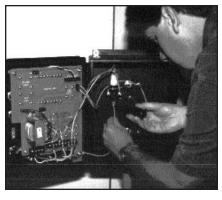

BATTING RANGE EQUIPMENT Continued on page 6

SAFETY IN THE BATTING CAGE

Continued from page 4

MAINTENANCE AND ROUTINE ADJUSTMENTS

Equipment maintenance and routine adjustments should only be performed by qualified persons with a full understanding of the equipment and how it operates. It is also very important that the person maintaining the equip-

ment understand about the batting range operation and risks involved with repairing and maintaining the system. All daily, weekly, monthly and other periodic maintenance should be conducted on the pitching machine equipment and the related equipment. Refer to "ABC Operators Manual" for specific maintenance procedures. Document all maintenance and adjustment procedures and file for future reference.

COMMUNICATIONS

The Safety Program must be communicated clearly and understood by every person involved in it's implementation. Communication techniques should include written material along with on-site instruction and direction. All training sessions should be documented and filed for future reference.

HOUSEKEEPING

Safety Program should included a Housekeeping element and

all staff should understand the necessity of cleanliness.

EMERGENCY PRO-CEDURES

Management must detail Emergency Procedures which would be followed in the event emergency. any These emergencies will include NATURAL DISASTERS (wind. rain, earthquake, etc.), ACCIDENTS (injuries) and MAN-MADE DIS-ASTERS (bomb threats, structural, power out-

ages, etc.).■

REMEMBER: SAFETY IS ALL OF OUR BUSINESS!

BATTING CAGE AND GOLF NETTING

Fisher Nets provides the highest quality netting for your batting cage or driving range. Over 15 years experience in the netting industry allows us to design and manufacture custom netting systems for your specific application.

REPORTS FROM ABC AND J&J

ARE YOU WIRED?

ABC AND J&J ARE!

Eric Hahl ABC System Administrator

ABC, J&J, and Kidzkart, Inc. are on the Internet! That's right, the World Wide Web, Cyberspace, The Information Super Highway, call it what you will, we are there.

Visit our WWW pages to find information on new products, services, and every thing you wanted to know about ABC, J&J and Kidzkart, Inc.. We feature our full line of go-karts, bumper boats, electric cars, batting cages and equipment on the pages.

When you hook up to our pages you can access our e-mail address and send us your comments about the web page or ask to be on our mailing list. We read our mail at least once per day so your e-mail won't wait long before it's read and replied too.

Our "New Stuff" page will contain information about new products and also has articles about updates to our existing products and services; so visit the "New stuff" page often.

Well, I'm sure I've bored you enough with this article, so check out our Web Pages at the following addresses:

The Move!! J&J'S NEW HOME

By Jennifer Keys

The last weekend in April, J&J Amusements packed up lock, stock and barrel and moved its entire operation to a new 50,000 sq. ft. facility. The entire crew is pleased with the move and couldn't wait to begin producing more karts and boats than we have in the past. Numerous cards and notices have gone out to prepare for the transition. In case anyone was missed, our new address is:

J&J Amusements, Inc. 4897 Indian School Rd. NE Salem, OR 97305-1126

Phone: 503-304-8899 Phone: 1-800-854-3140 Fax: 503-304-1899 Fax: 1-800-366-7505

It's a done deal! If you have any questions please give us a call.■

J&J's new head quarters in Salem, OR.

PRODUCT NEWS

HAVE YOU SEEN IT? "BIGFOOT AT J&J"

Marvin Foster, J&J Sales & Marketing Manager

Fred Flintstone probably had the best wearing tires around. Just as Fred said to Barney, "these round ones sure beat those old square tires." It was that constant Bump, Bump, Bump that caused Fred to change. Go-karting has come a long way since those old stone tire days. Tire technology has come a long way too. Most of today's karts use their tires to furnish suspension as well as traction. J&J recognized these needs and produced it's new BIG FOOT tire. BIG FOOT looks almost identical to several current concession kart tires now on the market. It is round with a 3.5" wide footprint and fits a 5" rim. In fact, they are the Same size as Powermasters 12x4x5. BIG FOOT has the double thick smooth tread surface, (sometimes referred to as a "new recap"), it has wear indicators cast into the sidewalls, it has all kinds of little numbers on the sidewall that must mean something to somebody, it has firm but semi flexible sidewalls to offer a degree or two of suspension and the rubbers durometer is higher to offer longer wear. You can buy them from J&J right now for \$15.95 each (\$14.95 each if you order 50 or more). Order part number 007880. New 5" inner tubes (PN 00778) are available at \$2.95 each (\$2.75 each if you order 50 or more). Call 800-854-3140 to place your order, or fax in your written order to 800-366-7505.■

SAFETY BULLETIN

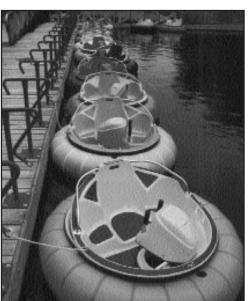

It has come to our attention that some bumper boats are being operated without propeller guards. This is totally unsafe!, Any units without propeller guards must be taken out of service immediately. Contact J&J for propeller guard prices and information.

Noise? Emissions? Pollution?

THE GREEN BOAT

Sharon Domaschofsky, J&J Sales/Marketing

Ever experience these issues? Problem solved! J&J introduces our electric bumper boat - the Lightning Bug. Similar in appearance to it's gas powered cousin but without emissions or pollution. Plus, low noise and maintenance. Designed and manufactured with the same quality that has made J&J a leader in this industry. Perfect for natural water

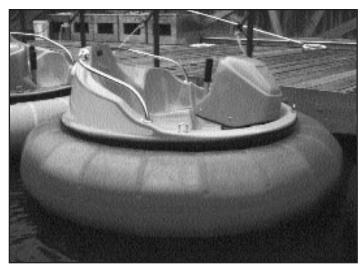

Adventure Landing, Jacksonville Beach, FL.

sources; won't harm the environment! No gas. No oil. No tuneups..just charge and go!

Chip Linville and Hank Woodburn of beautiful Adventure Landing in

Jacksonville Beach FL, recently added a fleet of electric boats to their park. Their Lightning Bugs will be operated in a "natural" water source.

Local officials had said "no" to gas but "yes" to electric!

J&J's New Lightning Bug electric bumper boat

Rudy & Margaret Thibodeau of **Funcity** in MN added an electric bumper boat attraction to their facility. The Thibodeau's will operate their boats in a man-made pond. They can expect to spend less on water treatment and boat maintenance than facilities with gas boats.

Whether you're starting a new facility or ready for a change, J&J's Lightning Bug is the environmentally friendly and good neighbor option.

Call Marvin or Sharon @ 800-854-3140 for more information.■

PRODUCT NEWS

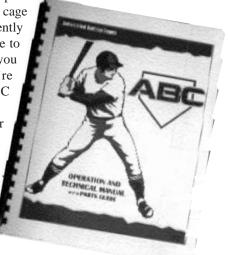

HOT OFF THE PRESS

ABC'S NEW OPERATION AND TECHNICAL MANUAL IS HERE!

Check out our NEW parts guide. This new manual comes complete with the Batting Cage Safety Program, Processor Manual, Trouble Shooting Guide, Maintenance Procedures, Servicing your Equipment, Price guide, Parts Guide (with pictures), and all the

forms you need to order parts and operate your batting cage smoothly. We are currently mailing the first copy free to all our customers, If you haven't received you're copy yet, please call ABC service dept. at 1-800-578-2243 to order you copy. Replacement copies of the manual (part #415) are \$10.00

each copy.■

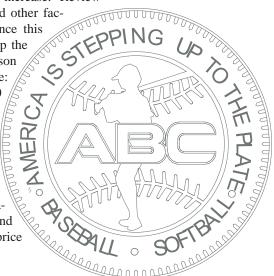

NEW PRICES!

WHEN DID YOU LAST RAISE YOUR PRICES?

If you haven't raised the prices for batting tokens recently, now is the time to consider this increase. Review

your competition and other factors that will influence this increase and mark up the prices as the newseason begins. An example: NEW PRICES-\$1.00 for 12 balls, OLD PRICE \$1.00 for 15 balls. Nationally, the average price varies between 10 to 15 balls for \$1.00, depending upon location, competition and the timing of theast price increase.

KidzKart is a Big Hit!

ADD MORE SMILES TO YOUR PARK!

"Sales of new electric KidzKarts have been very strong", states Dick Hall. "We have gotten very good reviews about the popularity of the karts and the reliability of the units".

of the karts of over tens hours of full time play." The "Kidzkart" sells for \$2,195.00 each. For further information, call "KidzKart Inc." at 800-578-2243.■

The new "KidzKart" is designed to accommodate children between the ages of 5 and twelve (small adults can even ride!). The kart is powered by a 12 volt battery supply and a built-in battery charger is provided for all karts.

"We expect the "KidzKart" to be a big hit for those operators that have full scale go-karts tracks and are looking for something that the young kids can drive," states Hall. "The owners of the karts have been very happy with the appeal of the karts. The little kids are flocking to the ride. The operators are reporting battery life

TECH TALK

With Doug Spray ABC General Manager

BALL DRYERS

Presently, range owners are required to have the ball dryers run constantly during rain or wet conditions. ABC has developed a new switching system that will turn the drying system on when a game is activated, and off when completed.

The advantage of this new system is that you may operate a ball dryer on both machines of a dual system. Since the switching will allow only one system at a time to run, one 20 amp electrical circuit can be used for both dryers. By switching the systems on and off, the balls are effectively dried, excessive heating is eliminated, and you will experience an energy savings. All systems currently in use may be upgraded. Upgrade kits for single stations cost \$145.00, and dual stations will cost \$195.00. New Ball Drying Systems complete with this feature will cost \$275.00 for single machines, and \$475.00 for dual machine stations. Call ABC Customer Service to order.

TECH MANUAL

Most of you have received the new ABC "Operational and Technical Manual" that was sent in June. As anticipated, we have discovered a few typographical errors that need to be corrected. Please make these changes in your manual for future reference. Page 47, under "Wheel Shaft Adjustments", the Y dimension for softball should be 3 7/8" rather than the 3 ½" shown. Also, in the "PARTS IDENTIFICATION & PRICE LIST" section, the "Conveyor U-Bolt" shows an incorrect part number of 335. That number should be changed to 355. We apologize for any inconvenience this may cause.

"Genesis" Frame

SINGLE DRIVE OR LIVE AXLE?

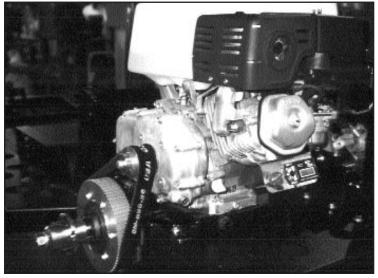

Leon Wilbanks, J&J General Manager

What is the best drive configuration? Some adhere to the single left rear wheel drive setup, while others prefer the "live-axle" or two wheel drive and still another group espouses the virtue of the right rear being the driven wheel. So, what's the best? The answer is they all are. Each track has its own character, number of right hand verses left hand turns, its own surface texture, etc. So the ultimate choice is dictated by the track and the personal preferences of its operator. Manufacturers tend to espouse the virtues of whatever configuration they build as being the best.

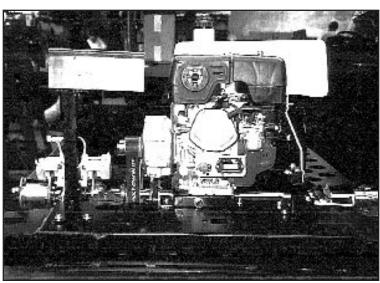

J&J has decided to put all this to rest by building a frame that is capable of being set up in any of the With Leon Wilbanks three configurations (currently available on Thunderbolt only). So the owner/operator can choose what J&J General Manager is best for the situation.

"We don't want to limit the customer," says General Manager, Leon Wilbanks. "On top of that we hope it drives our competition nuts," he continued. The system is simple and slick, just what you should expect from J&J.

Left drive configuration

Right drive configuration

CONNECTIONS

WE WANT YOU!

Dick Hall, ABC Vice President

Although the FEC industry has been around for many years, it has only been in the past few years that it has been sharing information about the many aspects of our business. Not all issues that our industry faces have been shared or resolved and perhaps that is the nature of our industry. However, some issues need to be discussed and solutions proposed. Do we need industry safety standards? Won't standards make life harder on the

operators and the manufacturers? Will it make our industry safer and make our lawsuits more defensible? What happens when I have an accident? Is saturation of FEC's becoming a problem? How do we hire good employees and how do we keep them motivated?

These are just a few of the many issues our industry is dealing with. Please get involved with these issues. Several excellent industry associations exist that can help us with many of these issues. All of the people that spend their "free" time to make these organizations informative and

International Association of Family Entertainment Centers (IAFEC)

Executive Director: Carole Sojlander

meaningful are unbelievably committed, extremely talented and tremendously knowledgeable about our industry! We urge all of you to join ALL of these associations. If you are not a member or want additional information about these organizations, please contact them directly.

ABC & J&J THANKS CUSTOMERS FROM AROUND THE COUNTRY

The 1996 season continues to be a very good year at ABC and J&J . As our customer list continues to grow, we would like to mention several new owners that have purchased our batting range equipment systems and go-kart or bumper boat fleets.

"Darien Lakes Amusement Park", from Darien, NY added a new five stall batting range to their amusement park. We are very excited about this operation. It represents one of the premier amusement parks in the USA joining the batting range business! They are reporting fabulous business and they are very happy with the cages.

Mr. Wilbur Hildebrand, owner of several "Putt Putt Golf and Games" operations added a seven cage system with two dual-machines to his Gastonia, NC location. Thanks, Wilbur. We're sure you will be pleased with the results of the cages in your facility.

From the home of the new St. Louis Rams we find the **Reuthers and Rothermichs'** opening their second Family Fun Center. Our dear friends, **Cathy, Bob, Patty and Larry** opened their second "Swing-Around Family Fun Center" late last summer. The new park features a nine stall batting range and "J & J" go-karts. Good Luck and Many Thanks!

From Texas, **Frank Diaz** and his family added a new nine cage batting range in their home town of Laredo, TX. We want to thank Frank and his family for the wonderful Texas Hospitality they shared

with Darien Lenz, our ABC installer. We are thrilled to add Frank to our ABC family. Frank has also qualified for our Nice Guy Award!

We have two new operators in the "Rocky Mountain High" state of Colorado. **Toby Reed** added a beautiful eight cage system to his new and spectacular "Celebrity Golf" FEC in Colorado Springs. In Englewood, Colorado, South Suburban Park and Recreation Department added a nine cage system to their community park.

Our California neighbors continue to develop new FECs. **Kent Philips** and **Georgia Clausen** have just completed their second **"Mulligan's Family Fun Center"** in Murietta, CA. The first Mulligan's Fun Center is located in Torrance, CA.. The new center purchased a nine cage ABC batting range and J & J Amusements gokarts and bumper boats. **Thanks, Georgia and Kent for your con-**

CONNECTIONS

tinued trust in our companies!

From the "Great Northwest", Larry Hill has completed his new nine cage system with three dual-machines for "Casey's Second Chance Batting Cages" in Seattle, WA. Catchy name, Larry. (Seattle already has it's own "Casey" in the form of Ken Griffey Jr. Junior's got the most beautiful swing in baseball!) Good Luck, Larry and Thanks!

Partners Anthony DeAngelis and Aristotle Halikias turned their dreams into reality when they developed a parcel of land across the street from the New World Music Theater, an outdoor music pavillion in Tinley Park, Illinois. Their highly visible location south of I-80, at Harlem and Oak Park Avenues in the Chicago suburb is right next to the Odyssey Golf Course and Driving Range. The center started in June '94 with 43,000 sq. ft. of indoor attractions which now includes a 4 level interactive soft play area, 200 video and redemption games, lazer tag, Connies pizza restaurant and a gift shop. The restaurant is combined with a 350 seat Anamatronics stage show and surrounded by seven party rooms. Today; the 15 acre park presents 36 holes of adventure golf, 9 stall ABC batting cage, a Hydro Racer speed boat water course and Kidz adventure park complete with a train, mini bumper boats, and a Ferris wheel. Other spectacular attractions featureing J&J equipment include Island Raceway and Raceway 2000 go-kart tracks plus the "radical" Snake Water Island bumper boat attraction. In fact, with all Odyssey Fun Worlds stylized and elaborately themed attractions, the whole place is radical! "We have areas designated for temporary attractions where we can

change the entertainment to stay fresh and exciting...we try hard to please everybody," Anthony said.■

Odyssey Fun Worlds Snake Water Island Bumper Boat pond

ABC and J&J thank all of our new customers and the hundreds of our other existing batting cage and go-kart/bumper boat fleet owners. We hope your 1996 season is a tremendous success!■
